PROFESSIONAL SUMMARY

Mobile engineer with 7+ years building cross-platform applications in Flutter and React Native, alongside the fullstack work behind them. Shipped mobile experiences for fintech platforms serving 10,000+ and 15,000+ users, and currently ships a Flutter payments client on a concurrent contract.

SKILLS

Languages	TypeScript · JavaScript · Dart · Go
Mobile	Flutter · React Native · Ionic · Expo
Backend integration	REST · GraphQL · Node.js · Firebase
Frontend	React · Next.js · Vue · TailwindCSS
Cloud & Tooling	AWS · Terraform · Docker · GitHub Actions · Git

EXPERIENCE

Full Stack Engineer · Kikokushijo Academy (Tokyo, Japan · Remote) Jan 2026 – Present

- Build and maintain the learning platform behind an academy running 11+ campuses, working across responsive web clients used heavily on phones and tablets in class.
- Shipped real-time collaborative features including a multi-user lesson whiteboard and attendance tracking.

Frontend Developer · BPOSeats (Cebu, Philippines · Remote) Oct 2023 – Apr 2026

- Led frontend development for the company's internal platform in Vue.js and SCSS, building the responsive component set used across the product.
- Built server-side features in Django and Django REST Framework, and profiled and rewrote the slowest API endpoints.
- Introduced MJML for transactional email so templates render consistently across major email clients.

Senior Software Developer · Helppo Africa (Lagos, Nigeria · Remote) May 2023 – Nov 2023

- Led development of the mobile experience for a financial platform serving over 10,000 active users, built in Ionic and Angular.
- Worked with designers to build the transaction and payment interfaces.
- Integrated the mobile client against REST and GraphQL APIs.

Mobile App Developer · Xedla Pay (Kwara, Nigeria) Contract, concurrent · Jan 2023 – Present

- Contributed the virtual-card and escrow screens to the Flutter client, live on the App Store and Google Play, and wrote the request-encryption layer shared across the platform clients.
- Primary author of four of the backend services the client talks to, covering accounts, escrow, transactions and virtual cards.
- Author the Terraform that provisions the AWS storage the clients depend on.

Frontend Developer · Summitech Computing Ltd (Lagos, Nigeria · Remote) Oct 2022 – May 2023

- Built and maintained frontend for enterprise software products, engineering reusable component libraries adopted across multiple products.
- Worked on the API layer alongside the frontend, including database query performance.

Frontend Developer · VeendHQ (Wyoming, USA · Remote) Contract · Feb 2022 – Oct 2022

- Contributed to the React Native mobile app for fintech platforms serving over 15,000 users.
- Worked across the mobile client and the web product against a shared API surface.
- Wrote unit tests and worked through the defects that reached production.

Senior Software Developer · Fovero Digital Technologies (Lagos, Nigeria) Part-time · Feb 2020 – Jan 2022

- Led design and delivery of web and mobile software for agency clients, from scoping through release.
- Ran the infrastructure side end to end: provisioning, deployment, DNS, certificates and uptime.
- Mentored junior developers and ran code review.

IT Instructor · New Horizons Computer Learning Centers (Lagos, Nigeria) Oct 2019 – Feb 2020

- Designed and delivered training on core programming concepts.
- Built and deployed client web applications in HTML, CSS, JavaScript and PHP.

PROJECTS

Meal Flow (github.com/Maestroharyor/Meal-Flow) — The same product built twice, in React Native and in Flutter, as a direct comparison of the two toolchains. [React Native](#) · [Flutter](#)

MosesTab (mosestab.com) — Tenant-scoped church management SaaS: members, events, attendance, child check-in and giving. Per-church Stripe Connect accounts and payouts, and SMS text-to-give over Twilio. [React](#) · [TypeScript](#) · [Next.js](#) · [Stripe](#)

Braandly (braandly.com) — Multi-tenant brand management SaaS. Workspace-scoped data across 85 models, a versioned public REST API, a self-built OAuth 2.1 server and an MCP server exposing 102 tools. Sole author of the backend; I build and operate it end to end. [Next.js](#) · [Express](#) · [MongoDB](#) · [Redis](#)

EDUCATION

University of Ilorin, Nigeria — B.Sc. Physiology, 2019

CERTIFICATIONS

AWS Solutions Architect Associate (SAA-C03) — *In progress*

CompTIA Security+ — *Planned*

AWS Security Specialty — *Planned*
